

ICT allows mass customization in terms of educational activities and boosts learners' knowledge retention and interest levels. Students can do many educations in the comfort of their classrooms and they are able to share their knowledge with peers worldwide.

Teachers most often use ICTs for 'routine tasks' (record keeping, lesson plan development, information presentation, basic information searches on the Internet). Teachers more knowledgeable in ICTs use utilize computer assisted instruction less than other teachers who use ICTs, but utilize ICTs more overall.

Information and communications technology (ICT) plays a profound role in any business growth. It improves employee communication, automates many business operations, and enhances the transparency of your projects.
